

# TESTING OF AUTOMATED VEHICLES

## AUTOMATED GUIDED VEHICLES

*Location: Flanders Make - Lommel*

## DESCRIPTION

We have several commercial Automated Guided Vehicles or AGVs and mobile robots available. Varying in size, from small-scale research platforms to commercial platforms. We use these AGVs for research into sensing, absolute and relative localisation, and navigation. We have dedicated labs equipped with different sensors for localisation of the platform, that are also open for usage with other AGVs.

## TECHNICAL SPECIFICATIONS

We have the following AGV's available:

- Kuka KMR iiwa
- Movanis Taurus, based on Still EXV-SF 16
- Kuka YouBot
- Pioneer p3DX
- MIR500
- MIR Hook

# TESTING OF AUTOMATED VEHICLES

## OUR OFFER

We offer our AGVs for testing of components at system levels, such as localisation and navigation solutions.
